SKATEBOARDS

# INTRO

**At Solid, we all skate.**

**We know the fun and excitement we've found through skateboarding.**

**The friends we've made, the places we've travelled, the things we've seen, and the challenges we've overcome.**

**These are the important elements of skateboarding that we want to share with future generations,  
so all Solid products are designed with these in mind.**

**All Solid components are made to the same standards in the same factory as those used by professionals,  
which mean they are more than strong enough to survive intense use.**

**We've thought hard about what a child needs from a skateboard at all stages of their development,  
and designed boards to match those needs -  
even down to the graphics that are specially designed to blow minds!**

**Solid Skateboards are made to change lives for the better, just like skateboarding changed ours.**

**SPECIAL KIDS SHAPES**

## EYE

Kid Bamboo Longboard  
Mellow concave  
Size: 8.25" X 31.5"  
150 mm inverted trucks  
62mm 83 A stone ground wheels  
Abec 7 bearings

# KID BAMBOO LONGBOARD

The Solid Bamboo Longboard is designed to give the longboarding experience for the smaller rider.

We've scaled down the wheelbase in proportion to a child's height, and completely covered the top with clear grip so that there is no slipping feet when riding fast.

Our special Bamboo formula adds greater flex for smoother riding.  
And panda bears will love you!

The 83a wheels are made with a special „slide“ formula. They'll grip until you need them to slide, meaning more control when cornering at speed, and more style in your downhill runs.

Age range: 4 to 12 years old

**EYE Orange**  
Kid Longboard  
Mellow concave  
Size: 8.25" x 31.5"  
150 mm inverted trucks  
62mm 83 A stone ground wheels  
Abec 7 bearings

## KID LONGBOARD

The Solid longboard is designed to give the longboarding experience for the smaller rider. We've scaled down the wheelbase in proportion to a child's height, and completely covered the top with clear grip so that there is no slipping feet when riding fast.

The 83a wheels are made with a special „slide“ formula. They'll grip until you need them to slide, meaning more control when cornering at speed, and more style in your downhill runs.

Age range: 4 to 12 years old

**EYE Green**  
Kid Longboard  
Mellow concave  
Size: 8.25" x 31.5"  
150 mm inverted trucks  
62mm 83 A stone ground wheels  
Abec 7 bearings

**EASY RIDE**  
Kid Pintail  
Camber with flex  
Size: 76.25" X 29.5"  
150 mm Inverted trucks  
62mm 83 A stone grounded wheels  
Abec 7 bearings

## KID PINTAIL

The Solid Pintail is for those that want a longboarding ride with a surfer style. A pintail offers better turns for more carving action, turning the sidewalk into an endless wave.

63mm 83a „Sleyed Ball“ longboard wheels will keep you afloat, no matter how rocky the road gets.

Age range: 4 to 12 years old

## **BAT CRUISER**

Kid Cruiser

Medium concave with Wheelwells and Tailkick

Size: 8.25" X 31.125"

150 mm Inverted trucks

62mm 83 A stone grounded wheels

Abec 7 bearings

# **KID BAT CRUISER**

**The Bat Cruiser is the perfect urban transport.**

**The long wheelbase gives the speed and stability of a longboard, but the tail means emergency kick turns around pedestrians and ollies up curbs create a safer ride on city streets.**

**Equipped with 63mm „SlEyed Ball“ longboard wheels, the Bat Cruiser will keep you moving from dawn til dusk.**

**Age range: 4 to 12 years old**

## **SCHOOLCRUISER**

Kid Cruiser

Medium concave with Wheelwells and Tailkick

Size: 7.5" x 29.25"

53mm 83 A quality urethane

Abec 7 bearings

# **KID SCHOOLCRUISER**

**Ideal for the child that can't choose between  
a regular skateboard and a longboard.**

**The simple shape means all tricks are possible at the skatepark, but the softer,  
85a wheels make this board ideal for transport around town.  
Don't be a fool - skate to school!**

**Age range: 4 to 12 years old**

**ROBOT**  
Kids Wide  
Medium concave  
Size: 8" x 24.75"  
53mm 83 A quality urethane  
Abec 7 bearings

## KIDS WIDE

The ultimate board for the beginner. Rather than take an adult size board and scale it down, we've thought about what a beginner really needs.

This set up is specifically designed for those early stages, when we spend more time on our knees and sitting on the board than we do standing. We've kept it wide to help with balance, with a shorter nose to keep the weight down. Soft 85a wheels will roll on all surfaces and won't hang up on gravel and small stones.

And Mum, we've even thought of you -  
instead of regular grip tape we've developed a special foam grip.  
It will grip the feet when standing,  
but won't rip out the knees of your child's pants!

Age range: 1 to 7 years old.

**BAGGER**  
Kids Twintail  
Medium concave  
Size: 7.5" x 28.3"  
53mm 83 A quality urethane  
Abec 7 bearings

## KIDS TWINTAIL

This board was created for those that can already stand up to skate. The twin tail design means you can ride either way and encourages your child to learn to skate „switch stance“.

This means they will be as confident going backwards as forwards, leading to a greater skill level faster, and hopefully less accidents.

Equipped with 85a wheels to keep you rolling as it's important that you learn to steer, carve, and handle speed before you learn tricks.

Age range: 5 to 10 years old

**ROBOT**  
Kids Twintail  
Medium concave  
Size: 7.5" x 28.3"  
53mm 83 A quality urethane  
Abec 7 bearings

## BOARDS

Solids Standard range are aimed at kids 8 years and above. Constructed from seven ply's of 100% hardrock maple with epoxy resin, the tried and tested formula for a skateboard deck, means these won't break when Dad tries to impress the kids! Wheels, trucks, bearings and bolts are the same high quality used for „adult“ skateboards, giving years of use.

**BAGGER**  
Complete  
Size: 7.625" x 31.375"  
Medium concave  
5.0 Solid Truck  
51mm 99A quality urethane  
Abec 7

**BAT LOGO**
